

OVERVIEW

SLhealth is a comprehensive health management solution designed to monitor patient health, medications, injections, tests and adherence to treatment schedules. It features an integrated AI engine that predicts potential health risks by analyzing multiple parameters without compromising sensitive data. SLhealth operates as a multi-tenant system with a web application for clinics, hospitals, nursing homes and a mobile app for patients. Healthcare providers can create customizable treatment plans via the web app, which patients access through the mobile app for self-administration. Patients acknowledge task completion, such as taking medication, using the app. Built-in calendars, timelines, and reminders ensure patients stay on track with their treatment activities throughout the care journey.

FEATURES

Health Tracking:

Monitors patient health, medications, injections, tests and adherence to treatment schedules

AI-Powered Insights:

The integrated AI solution can predict a patient's potential health hazards by analyzing various parameters without compromising on any sensitive data.

Multi-Tenant Architecture:

Set of web and mobile applications enabling multiple clinics, hospitals and healthcare providers to operate independently within the same system.

Web Application:

Tailored for clinics, hospitals and nursing homes to create fully customizable treatment plans.

Mobile App:

Designed for patients to access their treatment plans and manage self-administration activities.

Patient Engagement:

Patients receive reminders through an intuitive calendar and timeline view. Secured chat is also available.
